Freestanding Chime Panel with Posts

Meets National Standards for: ✓ **ASTM** F1487-17 ✓ **CPSC** Guidelines #325

Product Description

Chime in with a bit of music with the Freestanding Chime Panel. This barrier type panel is built as a resonating chamber for the set of chimes within it. The chimes are safely situated on the interior to protect them from the elements and wear and tear of children playing on them. They are simple to operate, too. With a gentle push down, the chime emits a singular tone. Press more than one or multiple levers at once to create even more notes. The entire apparatus comes with 6 separate notes that, while unpitched, create a set of sounds that are jangling with joy. Children will happily run through your playground stopping to create a melody of their own on the Freestanding Chime Panel. Make the panel fit your play area by choosing your colors from our selection of metal and plastics. The panel is available with posts and it can fit any of our 3-½-inch, 4-inch, or 5-inch posts.

Product Specifications

Model Number: PFS050P
Age Range: 2-12 years
Post Diameter: 3.5-inch
Product Type: Music
Safety Zone: None required
